ADORN YOUR FLOOR

Will Not Chip or Peel
Easy To Keep Clean

EXPERT PREPARATION & APPLICATION

Custom Products Built For Your Needs

STEP 1: PREPARATION

Preparation includes diamond grinding on the surface. HEPA Vacuums keep dust to a minimum.

STEP 2: CONCRETE REPAIR

Our industrial grade, specially formulated fillers are used to fix pits and cracks before the process begins.

STEP 3: BASECOAT

100% solids, self-priming base coat is mixed and applied.

STEP 4: BROADCASTING THE CHIP

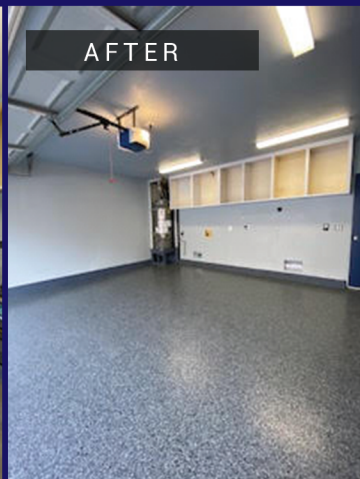

Immediately after the basecoat application, the chip is hand broadcast for full coverage, providing both color and texture to the floor.

STEP 5: SCRAPING THE CHIP

Once the basecoat is fully cured the floor is scraped and vacuumed to remove any loose or vertical standing flakes.

STEP 6: CLEAR COAT

The final step is to roll out the UV stable polyaspartic clear coat.
